Jamie Walker

AI Engineer · Python & Django · Full Stack

Email: J.Danielwalker92@gmail.com
GitHub: github.com/J-Codes-Walkz
Live project: CardVault on Heroku

PROFILE

Junior AI Engineer and full stack Python developer, moving into engineering after **10+ years in technology recruitment**. I build with AI the way a lead works with a strong team: I set the plan and the standards, direct agentic tools such as **Claude Code**, and check every result with tests and evidence before it ships.

My capstone, **CardVault**, is a live Django and PostgreSQL app with **229 automated tests, 99% code coverage and CI/CD**, plus a written record of every AI decision, including the AI's own mistakes and how they were caught. Long term I am working towards **AI architecture**: designing systems where AI is useful, safe and accountable.

SKILLS

AI ENGINEERING

Claude Code (agentic coding, skills, sub-agents) · Prompt and context design · Reviewing and verifying AI output · AI knowledge graphs (graphify) · Ethical AI governance

LANGUAGES AND FRAMEWORKS

Python · Django 5.2 · django-allauth · PostgreSQL · JavaScript · HTML5 · CSS3 · Bootstrap · tkinter

TESTING AND QUALITY

Django test framework · coverage.py · flake8 (PEP 8) · Lighthouse · axe and WAVE (WCAG 2.2 AA) · W3C validators · Load testing

DEVOPS AND SECURITY

Git and GitHub · GitHub Actions CI · Heroku · Bandit · pip-audit · CodeQL · Rate limiting · Content Security Policy

WAYS OF WORKING

Agile sprints · Kanban (GitHub Projects) · User stories and MoSCoW · Wireframing · Technical documentation · Stakeholder management

FEATURED PROJECT

CardVault

Live site · Code · Project board

Pokémon card collection app · Code Institute capstone · October 2026

229 tests · **99% coverage** · **Lighthouse 100 accessibility** · **WCAG 2.2 AA** · **CI/CD** · **34 user stories**

Python · Django 5.2 · PostgreSQL · JavaScript · GitHub Actions · Heroku · Claude Code

- Built and deployed a full stack **Django and PostgreSQL** app where collectors register, track the cards they own and want, and write reviews, with full CRUD behind a real login system.
- Planned and delivered it in **3 Agile sprints** on a GitHub Projects board: **34 user stories** with MoSCoW priorities and acceptance criteria, **73 issues**, and every bug logged and closed by the commit that fixed it.
- **229 automated tests at 99% coverage**, including two-user tests proving nobody can view or change another user's data. **GitHub Actions CI** (flake8, the tests on PostgreSQL, Bandit, pip-audit) must pass before Heroku deploys.
- **Security by design:** 3 wrong passwords lock a username for 15 minutes, per-visitor rate limits behind Heroku's router, a Content Security Policy, HSTS, a superuser-only admin, daily database backups and a full secret scan of the git history.
- **Lighthouse 100** for Accessibility and SEO on every page, **0 WCAG 2.2 AA violations** (axe), and load tested to 2,000 visits, 25 at a time, with a median response of 0.21 seconds.
- **AI-directed development:** worked with Claude Code as an agentic pair, using skills and parallel sub-agents (including a 1,000+ node knowledge graph of the project), and kept a **34-entry AI log** of each decision, what was verified, and every mistake the AI made and how it was corrected.

OTHER PROJECTS

Team 3 Hackathon: Active Community

Live site · Code

Team of 3 · September 2026 · HTML, CSS, JavaScript, Bootstrap

- A one-page site for finding fitness and community events across the UK. I built the **hero, header and footer**, the **whole modal system** (sign up, log in, about, contact, join) in JavaScript, and the **colour palette and UI styling**, working to a shared Kanban board and wireframe.

Snake

Code

Solo · September 2026 · Python, tkinter

- A desktop Snake game in **Python** with smooth movement, speed that rises with the score, pause and restart, and a **high score saved to a JSON file**, written with type hints and a single, named colour palette.

Learning To Code

Live site · Code

Solo · August 2026 · HTML, CSS

- My first project: an accessible one-page guide for beginners, using semantic HTML, **Flexbox and CSS Grid**, labelled forms and a Balsamiq wireframe.

TRAINING

Code Institute: Full Stack Software Engineering

16-week intensive bootcamp · 2026

- Built and deployed solo and team projects in HTML, CSS, JavaScript, Python and Django, with wireframes, READMEs, testing write-ups and presentations, managed on Kanban boards.

AI learning and governance

Ongoing

- Ethical AI Governance coursework (Coursera) and UNESCO's Global MOOC on the Ethics of AI. I build my own learning systems and Python and JavaScript guides with Claude, Copilot and ChatGPT, using structured prompts to get reliable results.

CAREER HISTORY

10+ years in technology recruitment, specialising in **backend and cloud (.NET and Azure)** engineers. I know how strong engineering teams hire, work and communicate, and I bring stakeholder management, negotiation and clear writing to every team I join.

Accenture · Talent Acquisition Lead (fixed-term contract)

January 2025 to June 2026

- Led hiring campaigns across Technology, Marketing, Sales and Procurement, managing the full cycle through to offer negotiation.
- Wrote internal documentation and improved recruitment systems; trained in cybersecurity, HR policy, mental health and advanced recruitment practice.

Aspire · Senior Consultant

January 2024 to December 2024

- **Top biller in Q2**, with £182,427 revenue, placing talent across Technology, Digital, Media, Marketing, Research and Sales.

Harvey Nash · Delivery Team Lead

January 2023 to January 2024

- **Designed and led a new Apprenticeship Academy**: managed apprentices' training, development plans and performance reviews, and delivered into key accounts.

Spinks (Harvey Nash Group) · Technology Consultant

August 2019 to December 2022

- Recruited software engineers, designers and analysts; delivered **Spinks-on-Site** solutions worth £60,000+ and supported inclusion and diversity events.

EDUCATION

- UNESCO: Global MOOC on the Ethics of AI
- University of Wolverhampton: BSc (Hons) Music Technology, 2:1
- Birmingham City University: HND Popular Music and Practice
- SCCB: BTEC National Diploma
- A Levels: Music, Multimedia
